MESSAGE

According to UNO (The United Nations Organization) Pakistan is the 7th most populous country of the world. Its population has increased at rate of 3% per year in the last 20 years. The resources have not increased proportionally. Low per capita income does not allow a common woman to have proper antenatal and postnatal health care facilities especially in rural and neglected urban areas of Pakistan. It is one of the leading cause of mother Infant mortality rate in the city of Allama Iqbal, Sialkot.

74% of the total population of district Sialkot resides in rural and peripheries of the District. Hundreds of villages are deprived of basic health care facilities especially the non-availability of emergency, healthcare & antenatal / Postnatal care.

Realizing the gravity of the problems, a group of social workers, doctors and philanthropists of Sialkot has come forward under the banner of a charitable SHADE TRUST for the establishment of Sharifaan Bibi Memorial Hospital to serve the deserving community of Sialkot.

This project is a commitment to achieve millennium development goals No 3 & 4 to reduce maternal child mortality rate 2/3 by 2025 in district Sialkot with your support.

AIMS & OBJECTIVES

A focal point for emergency health care facilities:

- 1 Provision of health care facilities to the deserving and destitute community.
- 2 Provision of antenatal and postnatal care to the deserving and poor women of Sialkot.
- 3 Provision of free ambulance services in emergency to the non-affording patients.
